PROFESSIONAL SUMMARY

Applied Mathematics and Business Management graduate specializing in retail operations, supply chain, data management, and business analytics. Experienced in maintaining inventory records, reconciling sales and stock data, cleaning and standardizing datasets, and developing dashboards to support operational decision-making. Skilled in Excel, Power Query, SQL, Power BI, Tableau, Domo, and Qualtrics, with strong attention to accuracy, documentation, and identifying data inconsistencies.

EDUCATION

Bachelor of Science in Applied Mathematics (Data Science)

2022 – 2026

Bachelor of Science in Business Management (Supply Chain, Operations, & Analytics)

Brigham Young University - Hawaii, Laie, HI

GPA: 3.93 / 4.0

- Coursework: Probability & Mathematical Statistics, Mathematical Methods and Modeling, Business Analytics, Project Management, Global Logistics, Operations Management
- Honors and Awards: Summa Cum Laude, Dean's List (2022–2026), Academic Scholarship Recipient

EXPERIENCE

Institutional Research Data Visualization Developer

June 2025 – June 2026

Brigham Young University - Hawaii, Laie, HI, U.S.A.

- Built and maintained 10+ executive dashboards in Tableau, Power BI, and Domo by integrating Qualtrics and Student Information System data, enabling university leadership to make faster, data-driven decisions.
- Cleaned, transformed, and standardized 10+ institutional datasets using Excel and Power Query, improving reporting accuracy and reducing dashboard preparation time
- Analyzed multi-year performance datasets to identify trends and improvement opportunities, informing operational and strategic decisions

Math Teaching Assistant

September 2024 – June 2025

Brigham Young University - Hawaii, Laie, HI, U.S.A.

- Facilitated weekly quantitative problem-solving sessions for 30+ students, contributing to a 15% improvement in average lab scores.
- Designed supplemental learning resources and practice datasets, strengthening students' understanding of data analysis and mathematical modeling concepts
- Supported a faculty mentor by typing mathematical notes, formatting research proposals, and creating lab instruction materials in LaTeX to enhance course structure and proposal documentation

Retail Sales Associate

August 2022 – August 2024

Polynesian Cultural Center, Laie, HI, U.S.A.

- Maintained and updated inventory tracking records using Excel, improving stock accuracy to 95% through structured data management and regular reconciliation.
- Supported daily store operations through sales reporting, inventory reconciliation, transaction verification, and identification of stock discrepancies.
- Trained and coached 10+ associates on store systems, inventory procedures, and customer service processes, helping reduce operational errors by 40%.
- Managed product and sales information accurately while working in a fast-paced retail environment.
