PROFESSIONAL SUMMARY

Applied Mathematics and Business Management graduate specializing in data analytics, business intelligence, and operations. Experienced in developing executive dashboards, integrating and transforming data from multiple sources, and delivering actionable insights that support operational and strategic decision-making. Skilled in SQL, Excel, Power BI, Tableau, Domo, and Qualtrics, with experience translating data into actionable business insights.

EDUCATION

Bachelor of Science in Applied Mathematics (Data Science)

2022 – 2026

Bachelor of Science in Business Management (Supply Chain, Operations, & Analytics)

Brigham Young University - Hawaii, Laie, HI

GPA: 3.93 / 4.0

- Coursework: Probability & Mathematical Statistics, Mathematical Methods and Modeling, Business Analytics, Project Management, Global Logistics, Operations Management
- Honors and Awards: Summa Cum Laude, Dean's List (2022–2026), Academic Scholarship Recipient

EXPERIENCE

Institutional Research Data Visualization Developer

June 2025 – June 2026

Brigham Young University - Hawaii, Laie, HI, U.S.A.

- Built and maintained 10+ executive dashboards in Tableau, Power BI, and Domo by integrating Qualtrics and Student Information System data, enabling university leadership to make faster, data-driven decisions.
- Cleaned, transformed, and standardized 10+ institutional datasets using Excel and Power Query, improving reporting accuracy and reducing dashboard preparation time
- Analyzed multi-year performance datasets to identify trends and improvement opportunities, informing operational and strategic decisions
- Partnered with university leadership and institutional stakeholders to define reporting requirements and deliver executive dashboards supporting strategic planning and institutional decision-making.

Math Teaching Assistant

September 2024 – June 2025

Brigham Young University - Hawaii, Laie, HI, U.S.A.

- Facilitated weekly quantitative problem-solving sessions for 30+ students, contributing to a 15% improvement in average lab scores.
- Designed supplemental learning resources and practice datasets, strengthening students' understanding of data analysis and mathematical modeling concepts
- Supported a faculty mentor by typing mathematical notes, formatting research proposals, and creating lab instruction materials in LaTeX to enhance course structure and proposal documentation

Sales Associate

August 2022 – August 2024

Polynesian Cultural Center, Laie, HI, U.S.A.

- Maintained and updated inventory tracking systems using Excel, improving stock accuracy by 95% through structured data management practices
- Trained and coached 10+ new associates on store systems and customer service processes, increasing team efficiency and reducing operational errors by 40%
- Assisted with daily sales reporting, inventory reconciliation, and transaction accuracy to support store operations.
